Reconciling Stakeholder Perspectives in Deploying Automated Speed Enforcement

Frank Douma, Nichole Morris, Spencer Peck
University of Minnesota
• Empirical Evidence Shows Safety Benefits of ASE
  – Reduced speeds and crash severity

• Still a Controversial Policy
  – Inconsistent Deployment Methods
  – Due Process Concerns
  – Disagreement over Purpose
  – Anger that fines are being used for revenue generation

• Seeking to Crystalize and Understand Stakeholder Positions
  – Identify and Interview Key Influencers
  – Asking about perceptions of Colleagues, not personal or official positions
Method

• Qualitative Interviews
  – have completed 14 of up to 20
    • “Non-enforcement” Government (7)
    • Enforcement (3)
    • Public Health (4)

• Coding

• Issue Identification

**Diagram:**

- Diagram shows various coding-related concepts and relationships.
- Specific areas include: algorithms, data structures, programming languages, and software development methodologies.

---

**Notes:**

- Coding involves the process of writing computer programs.
- Includes various aspects such as debugging, testing, and version control.

---

**Further Resources:**

- Online courses on platforms like Coursera and Udemy.
- Books on computer science and software engineering.
- Coding communities and forums for support and collaboration.

---

**Conclusion:**

- Mastering coding skills is crucial for many career paths.
- Continuous learning and practice are essential for staying updated with new technologies and methodologies.
Initial Findings

• Fewer Foundational Reasons to Support
  – Safety main foundational support reason
  – But more foundational support than opposition

• Opposition Tends Towards Political
  – Cultural, Perception are big
  – Also Issues with implementation

• Both sides tend to believe public opposes
  (which surveys contradict)
Preliminary Conclusions

• Crux of the debate is political, not foundational
• Common Ground can be found
• Need to engage both sides in discussion of political issues
Next Steps (testing conclusions)

• Further interviews, esp. with Judiciary

• Word Clouds

• External Review
